

Project / System Engineer (ETZMA PSE1)

Job location: Łódź

Position summary:

Airbus Helicopters Polska – part of AIRBUS, the multinational, global leader of the aviation industry – is now searching for the System Engineer to join the newly created team, who will cooperate with the Avionic Systems Team in Germany and France. This is a wide and varied role that crosses many of the company's activities (software & hardware specification & development, testing, certification). It will enable you to be responsible for defining the top level specification of the systems and breaking them down to identify requirements for suppliers. You will cooperate and follow-up the development of the equipment by the suppliers, take part in the tests and prepare the documentation for the certification.

Your duties will include:

- System Engineering and integration of subsystems for helicopters (e.g.: Traffic Collision avoidance systems, HTAWS, Automatic Identification System, ADS-B, Weather Radar)
- Acting as functional and system design responsible (FDR / SDR)
- Interfacing with project management, purchasing & sales department of the different helicopter programs
- Interfacing with suppliers and internal & external customers
- Ensuring planning at equipment level for development and qualification
- Participating in offer management and contributing to product sourcing policy
- Ensuring the qualification / certification of equipment and the according function
- Supporting rig, ground and flight testing of the equipment
- In case, participation in research projects (e.g.: LUFO, EDA) and market studies in this field
- Supplier Management

Your profile:

- At least BSc degree in the field of Physics, Electrical Engineering, Aerospace Engineering, Computer Science or similar
- Work experience with Systems development and/or Systems integration
- Knowledge in the area of avionic systems in general is an advantage
- Good team player
- Good communication skills and assertiveness
- Strong analytical skills
- Ability to identify problems early, address them and propose solutions
- Proficiency in English; knowledge of French would be beneficial
